Made in Sweden

Some products have symbols indicating their suggested use and available packaging types. Here is a reference guide for all symbols:

Areas of use:

- Basic oral care for those with healthy mouths
- Suitable for children and/or juniors
- Suitable for those with braces
- Suitable for those with implants
- Suitable for those with gingivitis/periodontitis

Packaging:

- Flow pack
- Blister
- Bag
- Carton pack
- Box
- Tube
- Bottle

Reference:

1. Greenhouse gas emissions are calculated in accordnace with the GHG Protocol and ISO 14040 and ISO 14044.

2. TePe sources 100% raw materials for the toothbrush- and interdental brush handles, as well as the flosser, tongue cleaner, travel case, cap and extra grip, from either renewable raw materials or certified renewable raw materials via the mass balance approach, the latter independently certified by the International Sustainability and Carbon Certificate PLUS (ISCC PLUS).

3. Furness S, et al. Interventions for the management of dry mouth: topical therapies. Cochrane Database Syst Rev. 2011 Dec 7;(12):CD008934.

4. Key findings within the group saying dry mouth is affecting their daily life (13%). TePe – Mouth Dryness in UK, web panel questionnaire study with 1000 respondents, Transvector, April 2023.

Tiny things for big smiles

It's often the tiny things in life that make it meaningful, like starting the day by sharing a smile with a friend, colleague or a stranger. The same is true for our oral health; a few minutes of toothbrushing, flossing, and in-between brushing can greatly affect our overall health and wellbeing.

It's a tiny effort, but a huge deal.

Taking care of your mouth means taking care of your health. That's why we continue innovating, educating, and providing a broad range of products for better oral health.

We started in 1965, and have continued to find clever solutions ever since. Look through this catalogue and discover the tiny things TePe offers to make people lead healthier lives with healthy smiles.

Prevention starts with daily care

You have probably heard us talk about prevention many times. That's because it's really important to us. Caring for your teeth and gums is more than just a routine to make your mouth feel fresh; it's essential for preventing common issues like cavities and gum disease. In other words, brushing, flossing, and regular use of mouthwash – can save you from more extensive and expensive treatments in the future. Our products are designed to make daily prevention simple, effective, and enjoyable. Investing a little bit in our oral health today, can contribute to a healthier tomorrow.

1.

Education about prevention

TePe raises awareness about the positive impact of prevention with the aim to...

- Reduce development of oral diseases
- Reduce reoccurrence of oral diseases
- Improve or maintain level of oral diseases

2.

Increased knowledge improves health

Preventive care leads to healthier mouths which supports general health through...

- Functional wellbeing
- Psychological and social wellbeing
- The absence of discomfort or pain

3.

Improved health is good for the planet

Good general and oral health has a positive impact on the environment since it can lead to...

- Fewer resources used
- Less waste generated
- Reduced emissions

Sustainability is the healthy approach

Taking care of your teeth is great for your smile. Did you know that it can also contribute to creating a healthier planet? Healthy teeth often mean a lower environmental impact, as it can reduce the need for treatments and the emissions associated with dental repairs.

What about our products and production?
In Sweden, all of our products are made using 100% renewable energy, boosted by our own solar park. We actively work to reduce greenhouse gas emissions and are phasing out virgin fossil plastics in favour of renewable options.[1,2] Sustainability is a journey where improvements are made step by step, where every action counts – both big and small. That is what we call a healthy approach. Take a look at some of our milestones.

1965

This is the beginning of our sustainability journey. TePe is founded with the launch of the triangular wooden dental stick, which is made of Swedish wood and developed in collaboration with the Faculty of Odontology in Malmö, Sweden.

1993

Innovation of preventive care: the TePe Interdental brush is launched.

2016

TePe starts using hydro power. The production site is now powered by 100% renewable energy.

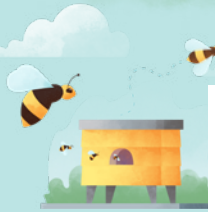
2018

A solar panel park is installed to power our production.

2019

Starts to phase out virgin fossil material. Introducing a Life Cycle Assessment for purchased materials for self-produced products and packaging.

2020



TePe's cross-functional sustainability team is established.

Honeybees find a new home on our roof.

2021

Linking 7 of the Global Goals to our strategy.

2022

All the handles for the TePe tooth-brushes and interdental brushes are from now on made with renewable or mass balance materials.

2023

Launching a tooth-brush with wooden handle and replace-able brush head and a dental floss made from recycled plastic bottles.

2024

Greenhouse gas mapping of scope 1, 2 and 3.

2025

100% of the packaging should now include renewable, recycled or FSC-certified materials.

2030

Contribute to 25 million healthy smiles.

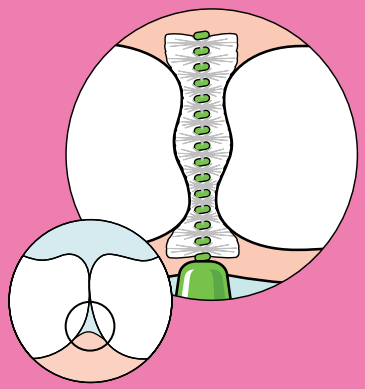
Interdental cleaning

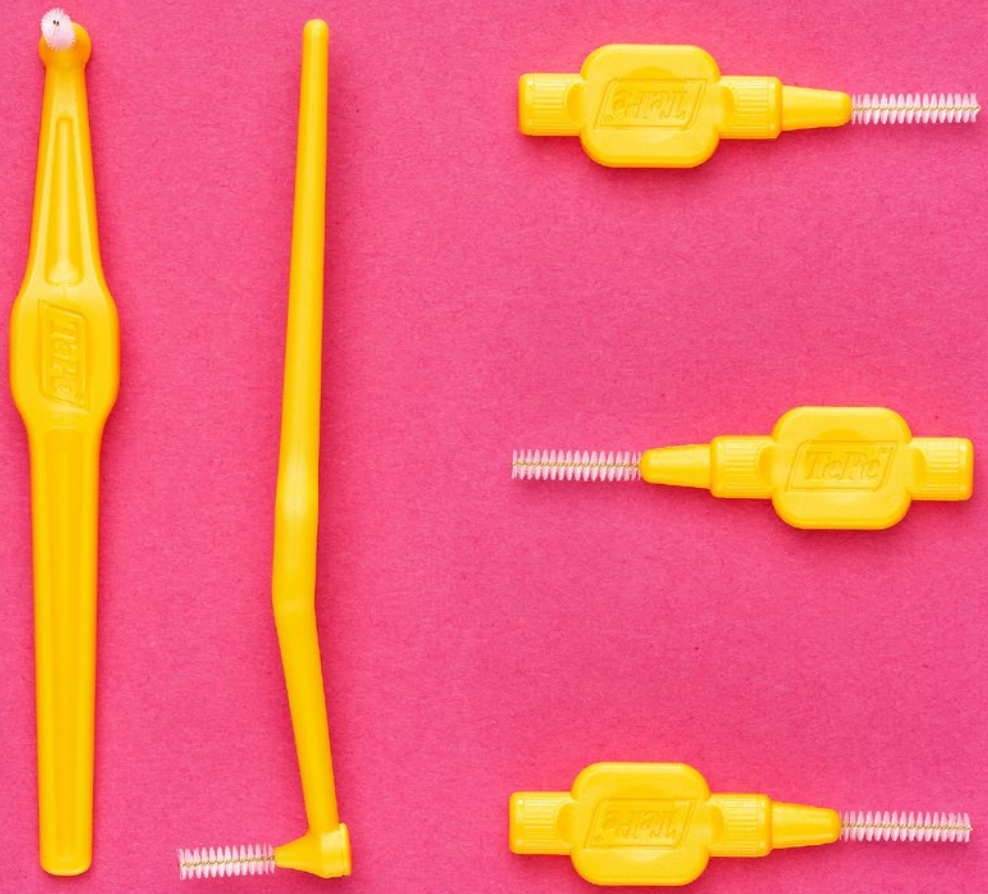
A special focus on interdental cleaning will keep those gaps gleaming and is essential for maintaining a healthy smile. We offer a range of interdental products designed to suit every individual and every type of gap.

Recommend the correct interdental cleaning product

When there are enough spaces between teeth, an interdental brush is the ideal tool. It can effectively reach and clean the nooks and crannies of the teeth, including the concave surfaces that floss may miss.

In narrow spaces where the gums completely fill the gap between the teeth, using floss or a toothpick is often sufficient to keep the area clean.





TePe

TePe® Interdental Brush Original

According to studies, interdental brushes are the most effective tool for removing plaque between teeth. Our brushes are developed together with dental experts, to ensure the highest functionality, comfort and quality. We offer 9 colour-coded ISO standard sizes, so there is a size for every type of gap, both big and small. Matching the gaps with the right colour makes it easy to remember what size you need. All the handles of our interdental brushes are made with renewable materials through the mass balance approach.[2]

Plastic-coated wire and rounded tip for safety and comfort.

The bristles cover the entire wire for safe and gentle cleaning.

Ergonomic handle for a stable grip.

It is user-friendly thanks to the colour-coded sizes.

The smaller brush sizes (0-3) have a flexible neck for increased durability and access.

The larger brush sizes have a thicker, bendable wire.

The plastic cap can be used for hygienic protection or to extend the handle.

TePe® Interdental Brush Original is also available in a mixed pack.

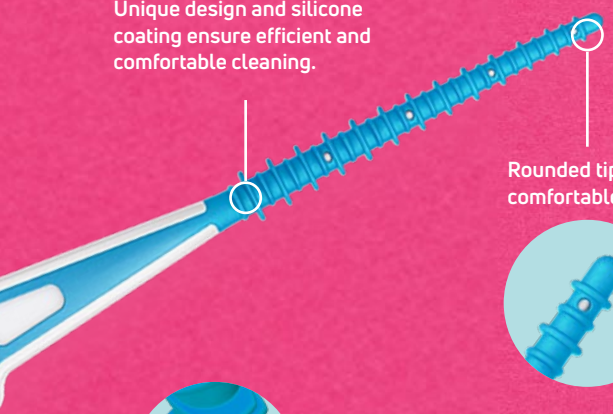
TePe EasyPick™ – easy cleaning in between

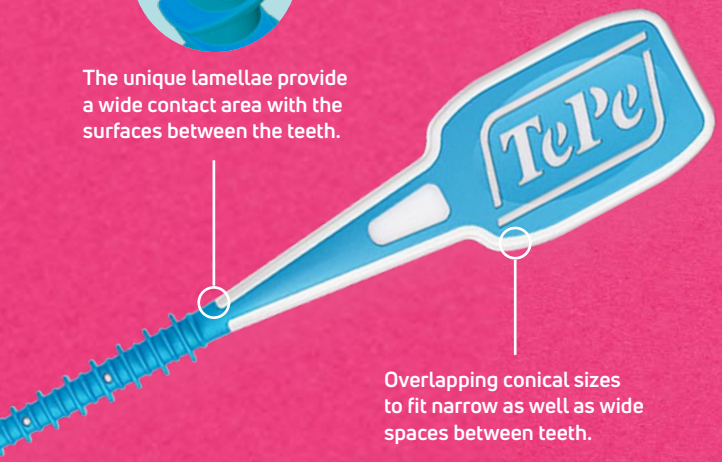
This soft silicone toothpick efficiently removes plaque and pesky food debris to keep your teeth and gums healthy and clean. It's flexible and comfortable to use, even if you have braces, implants, or crowns.



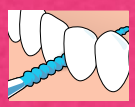
Unique design and silicone coating ensure efficient and comfortable cleaning.

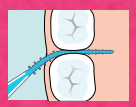
Rounded tip for comfortable use.

The unique lamellae provide a wide contact area with the surfaces between the teeth.



Overlapping conical sizes to fit narrow as well as wide spaces between teeth.





A handy pocket case for TePe EasyPick™ is included for easy cleaning on-the-go.

TePe EasyPick™

This product is a good choice for healthy mouths, in the case of gingivitis, and as an on-the-go alternative for everyone.

TePe® Travel Case

- Practical travel case for TePe® Interdental Brush, TePe Mini Flosser™ or TePe EasyPick™.
- Air holes to allow bristles to dry.
- For hygienic storage during travel.
- Made with renewable materials through the mass balance approach.[2]

x1 922 428

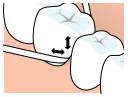
TePe® Dental Floss

Length: 5 m / 40 m

- Floss is recommended for tight interdental spaces, where an interdental brush will not fit.
- Expanding floss that suits different gaps as it adapts to the dental space.
- Slides easily between teeth due to its vegetable wax and avocado oil coating.
- Fresh mint flavour.

x1 642 095 (5 m)

x1 642 230 (40 m)



Gently move the floss along each tooth surface.

TePe® Bridge & Implant Floss

Amount: 30 pcs

- Wide and spongy floss for efficient cleaning.
- The short length and sturdy ends ease insertion and use.
- Invaluable for cleaning of implants, bridges and braces.
- Daily use contributes to healthy gums.

Toothbrushes & toothpaste

High-quality, well-designed, effective and yet gentle on teeth and gums. TePe's toothbrushes come in various models, sizes, bristle types, and colours, making daily oral care easy and user-friendly for people of all ages.

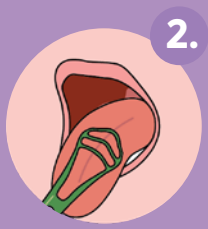
And what would toothbrushes be without their toothpaste? We are proud to offer our own toothpaste range that perfectly complements our toothbrushes. The TePe Daily & Pure range offers mild fluoride toothpaste for every family member and people with sensitive or dry mouths.

A simple 3-step routine for a healthier smile

1.

Always start by cleaning between your teeth to remove plaque. Using either an interdental brush or a dental floss is actually the most effective way to remove plaque between the teeth.

2.



The tongue cleaner is the magic wand against bad breath! The TePe Tongue Cleaner has three blades for a triple cleaning effect.
It's easy to use, removes bacteria with just a few strokes and prevents bad breath.

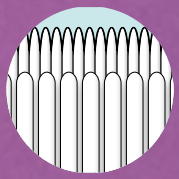
3.

Start by brushing the insides of your teeth to make sure they get as much love as the outsides. Brush twice a day for two minutes for optimal plaque removal and fluoride distribution.

TePe Supreme™ – supreme plaque removal with a gentle feel

Our innovative toothbrush that offers a longer reach, thanks to the two-level bristle design. The longer bristles clean further between the teeth and along the gum line, while the shorter bristles gently clean the rest of the tooth surfaces. Developed in collaboration with dental experts. And by the way, all the handles of our toothbrushes are made with renewable materials through the mass balance aproach.[2]

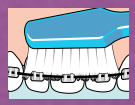
Unique two-level bristle design for excellent reach.



Can be angled in hot water for better access.

Easy-grip handle with thumb pad for extra comfort.

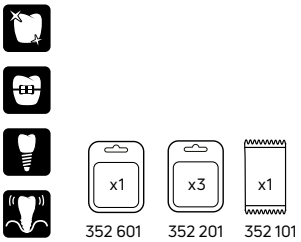
End-rounded and tapered filaments.



TePe Supreme™

Size: Regular
Bristles: Soft

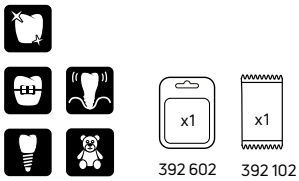
- Unique two-level bristle design for excellent reach.
- Easy-grip handle with thumb pad for extra comfort.



TePe Supreme™ Compact

Size: Compact
Bristles: Soft

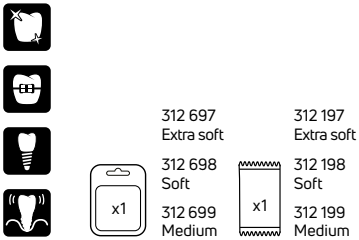
- Unique two-level bristle design for excellent reach and easy-grip handle with thumb pad.
- Suitable for adolescents or for adults who prefer a smaller brush head.



TePe Nova™

Size: Regular
Bristles: Extra soft (pink), soft (yellow) & medium (blue)

- Long brush tip and end-rounded bristles for effective and gentle cleaning.
- Easy-grip handle with thumb pad for extra comfort.



The 4x2 rule is worth sharing

Use about 2 cm of fluoride toothpaste for adults.
(Children 0–2 years: a rice grain-sized amount.
3–6 years: a pea-sized amount)

Brush your teeth morning and evening.

Brush for at least two minutes.

Avoid eating or drinking for two hours to get the most benefit from the fluoride.

TePe Select™ Regular

Size: Regular
Bristles: Extra soft, soft & medium

- Tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- User-friendly handle design.

A good routine for healthy teeth in the future

Kids need help with brushing their teeth

Until they're 10-12 years or so. Why not make it fun by adding a song or a story?

Create a habit

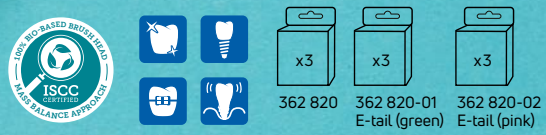
Brush the inside, outside and biting surfaces in the same order to make sure no side is forgotten. Remember the gum line where bacteria can easily build up and cause inflammation.

TePe Choice™ – brush away in a natural way

TePe Choice™ is an innovative and user-friendly toothbrush with a reusable handle made from Swedish beechwood, and three replaceable brush heads.

Size: Regular
Bristles: Soft

- Tapered brush head for easy access.
- Plant-based coating on the handle to minimise moisture absorption.
- Soft, end-rounded bristles for gentle and effective cleaning.
- Brush head made with renewable materials through the mass balance approach[2].



362 820 | 362 820-01 E-tail (green) | 362 820-02 E-tail (pink)

TePe Classic™

Size: Regular
Bristles: Soft

- User-friendly handle design.
- End-rounded bristles for gentle and effective cleaning.
- For those who prefer a bigger brush head.

TePe Daily™ Toothpaste

A high-quality toothpaste range that offers options for the whole family. It's effective against caries, gentle on the oral mucosa, and without unnecessary additives. TePe Daily is available in three varieties, for adults, kids, and babies, all with age-appropriate fluoride levels.

TePe Pure™ Toothpaste

The ideal choice for sensitive oral mucosa and dry mouth. The toothpaste come without foaming and colouring agents. Available in either a very mild taste or a flavourless option.

Good Environmental Choice

TePe has applied for the Swedish eco-label Bra Miljöval (Good Environmental Choice) and earned a certification for our toothpaste. We are proud to be the only toothpaste solid in Sweden with this environmental certification.

Dry mouth

Dry mouth is an often overlooked issue that affects 1 in 5 people.[3]
It is closely linked to oral health. We are proud to offer this important piece of the puzzle of improving oral health, with a wide range of products that soothe, provide comfort and protect teeth.

What do dry mouth sufferers say?[4]

26%
say dry mouth makes it **difficult to speak**

33%
of those affected in their daily life say that their **self confidence is negatively affected**

From those suffering more severely,
35%
say it **affects their sleep**

62%
do not talk about their dry mouth condition

Certain illnesses, medications and menopause can cause dry mouth

Now offering comfort for dry mouth

TePe's hydrate range is designed to provide easy and long-lasting comfort, wherever you are and whenever you need it. The products moisten, soothe and refresh.

The hydrating mouthwashes with fluoride also give additional caries protection. Due to the high fluoride in the mouthwash, we recommend using it 1-2 times/day, preferably not in connection to toothbrushing, for extra caries protection.

Unflavoured or flavoured?

We recommend unflavoured products for people with little or no saliva production and very sensitive or damaged mucosa.

TePe® Hydrating Mouthwash Mild apple peppermint

Sodium fluoride: 0,2%
Saliva-stimulating & moisturising: Malic Acid, Betaine and glycerin
Size: 500 ml
Age: From 12 years of age

- Moistens the mucosa and leaves a pleasant feeling in the mouth.
- Saliva-stimulating.
- Mild taste of apple and peppermint.
- Can be used twice a day.
- Practical dosing cup.

x1
832 314

TePe® Hydrating Mouthwash Unflavoured

Sodium fluoride: 0,2%
Moisturising: Glycerin
Size: 500 ml
Age: From 12 years of age

- Moistens the mucosa and leaves a pleasant feeling in the mouth.
- Gentle and unflavoured.
- Contains no alcohol.
- For very sensitive mouths.
- Can be used twice a day.

x1
832 313

TePe® Hydrating Mouth Gel Mild peppermint

Caries prevention: Xylitol
Moisturising: Betaine and glycerin
Size: 50 ml
Age: All ages

- Moistens, soothes and provides an immediate feeling of comfort.*

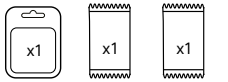
Speciality brushes

Wisdom teeth, dental implants, crowns/bridges or braces – no matter your needs, TePe can help make cleaning easier. TePe offers a wide range of high-quality cleaning devices with excellent functionality for those with specific oral hygiene needs.

TePe Special Care™

Size: Regular (red) & Compact (blue)
Bristles: Ultra soft

- For patients with extremely sore and delicate tissues, e.g. as a result of trauma, radiotherapy treatment or after oral surgery.
- 12,000 (Regular) and 9,000 (Compact) ultra soft bristles for delicate cleaning.
- First brush stage after oral surgery.*



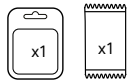
452 357 Regular
452 150 Regular
452 151 Compact

* A dental professional should always be consulted regarding brushing after oral surgery.

TePe Gentle Care™

Size: Regular
Bristles: Super soft

- For patients with dry mouth, sensitive root surfaces or sensitive oral tissues.
- Super soft filaments for gentle cleaning.
- Second brush stage after oral surgery.*



462 368
462 150

TePe® Denture Care

Size: Regular

- Effective and safe cleaning of removable dentures.
- Brush head can be bent backwards for improved grip and accessibility.
- Designed to resemble a regular toothbrush.

422 368

Long, strong filaments for efficient cleaning of dentures.

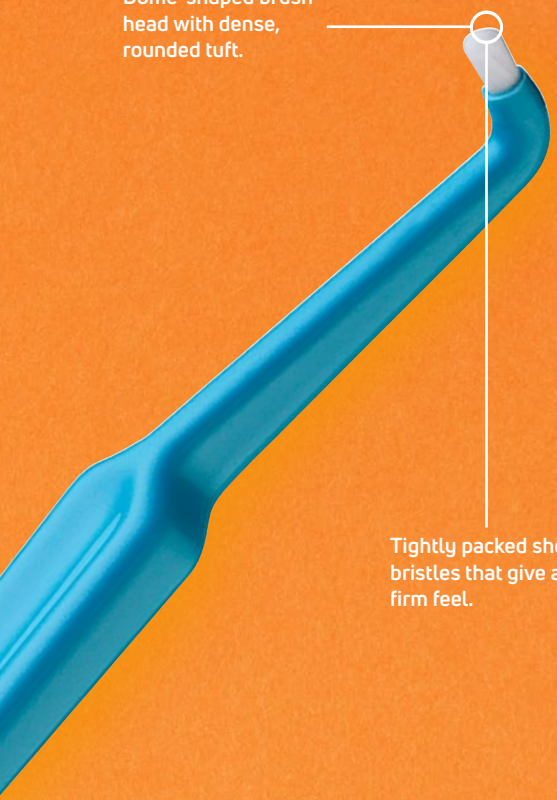
TePe® Tongue Cleaner

- Three blades for a triple cleaning effect.
- Helps prevent bad breath (halitosis).
- Removes bacteria in a few strokes.
- Made with renewable materials through the mass balance approach.[2]

942 385

TePe Compact Tuft™

TePe Compact Tuft is an angled brush designed for precision. It features a small, dome-shaped brush with tightly packed short filaments. With its stable handle and dense, firm tuft, this brush makes it easier to clean even the hardest-to-reach areas. And by the way, all the handles of our specialty brushes are made with renewable materials through the mass balance aproach.[2]



TePe Compact Tuft™

- Optimal for precision cleaning.
- Dome-shaped brush head with dense, rounded tuft.
- Ideal for cleaning along the gum line, on the occlusal surfaces of emerging teeth, or impacted wisdom teeth.

432 368

432 100

TePe Universal Care™

- A unique angle provides easy access to the lingual and palatal surfaces of teeth and implants.
- Makes it easier to clean narrow and hard-to-reach areas.
- End-rounded bristles for gentle cleaning.

472 368

The angled neck makes it easier to clean thef lingual surfaces.

TePe Interspace™

Bristles: Soft (yellow) & medium (blue)

- Ideal for cleaning furcations, implants, fixed braces or behind the last tooth.
- Brush tip can be attached to either side of the handle.
- Comes with 12 replaceable brush tips.

Healthy smiles for all mouths

TePe offers a wide selection of products suitable for all stages of life – from the first teeth to special needs like oral care for braces and implants. You will find our product recommendations throughout the following pages.

Paedodontic care

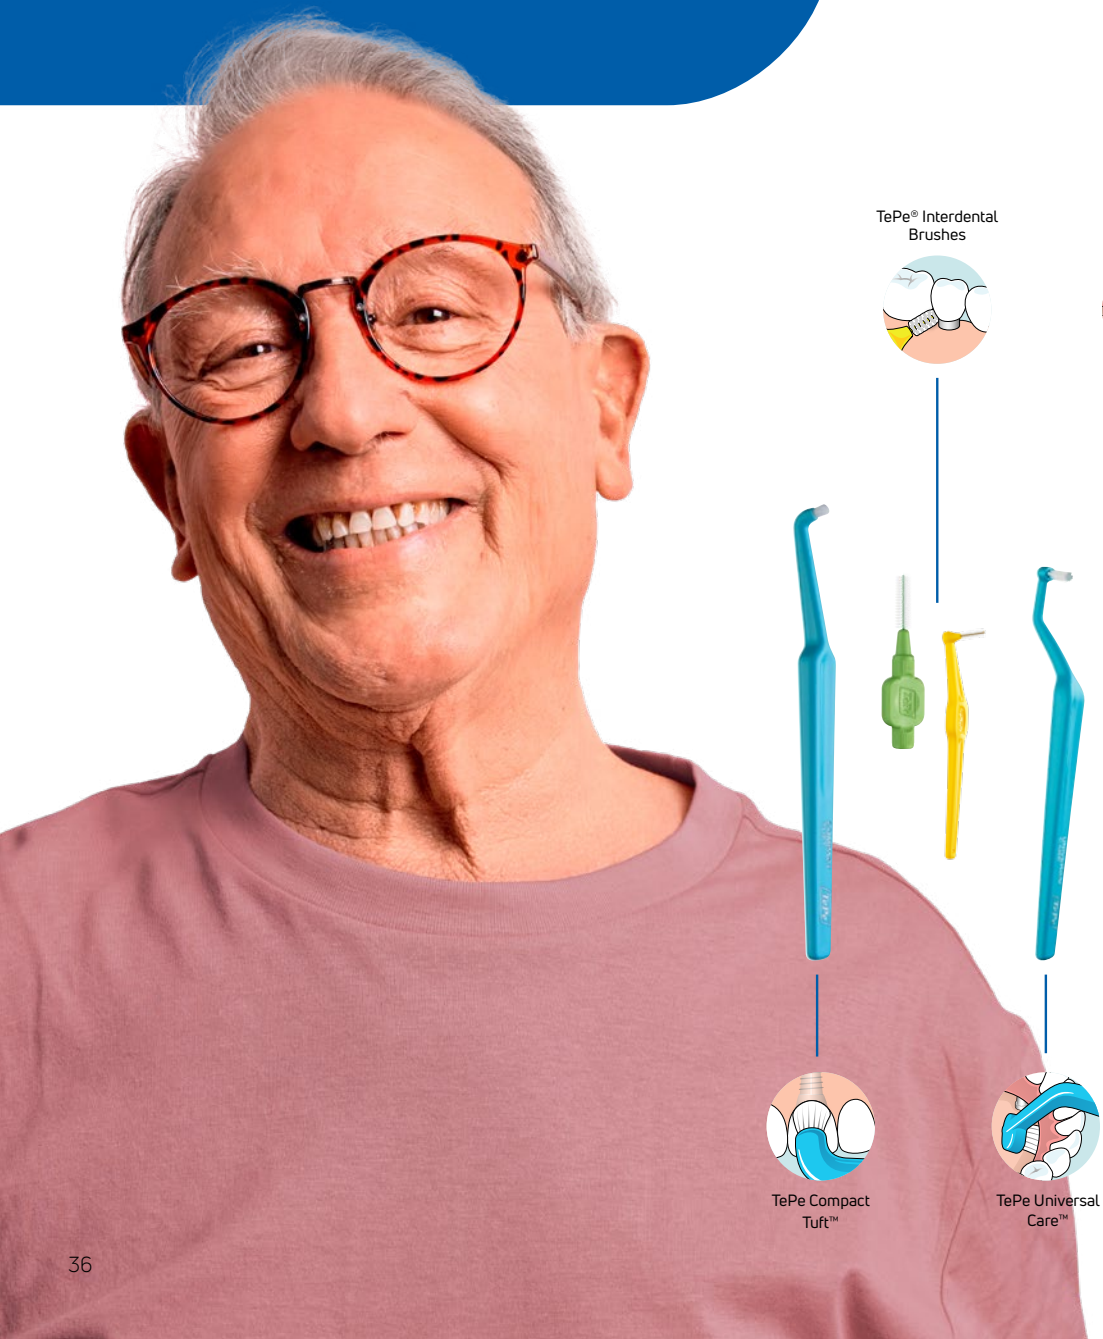
To keep the smile bright and healthy for a lifetime, we suggest brushing as soon as that first tooth pops up. It is often recommended to start with interdental cleaning during the teenage years.

Daily care

The foundation of maintaining healthy gums is daily interdental cleaning and toothbrushing. Professionals play a key role in motivating patients and recommending the right products.

Implant care

Getting the right advice on suitable products and cleaning techniques can make a big difference in keeping your implants healthy. Daily cleaning helps to prevent peri-implant diseases.



Orthodontic care

Fixed orthodontic appliances, like braces, can quickly accumulate plaque around brackets, bands, and wires. To keep the smile healthy and bright, it's important to establish a good self-care routine that helps prevent gingivitis and caries..

Sharing materials

Four times a year, we will provide dental professionals and students with a bundle of inspiration to apply in clinical practice. We offer our newsletter Simply Science, a Webinar and Tips and Tricks.

Simply Science is a valuable resource keeping you updated with the latest scientific research in oral health. It is a brief summary of a recent scientific article, along with key insights that you can directly apply to your clinical practice. Our Clinical and Education Team will focus on sharing topics related to TePe's core mission and the work of dental professionals - preventing oral disease and promoting healthy smiles worldwide.

We will continue with our highly appreciated webinars. Rest assured, as long as you register, you can access the recording even if you don't attend the live session. We don't want anyone to miss out on valuable knowledge.
