A leading innovator of implant dentistry, NeoBiotech beyond the limit.

Serving the best products and services to implantologists
under the motto of No.1 implant system in the world.

Ever since our foundation in the year 2000, **NeoBiotech** has been relentlessly striving for new and better ways in every area of implant dentistry with a central belief that our solutions must remain Simple, Safe, and Speedy (the 3S Spirit) for both the dentists and patients.

Today, **NeoBiotech** products, services, and educational offerings are available in around 75 countries worldwide.

NeoBiotech Co. believes that implant design should be developed based on implant surgical protocols prior to the application of other technologies. In 2007, Neobiotech introduced a new implant to the world, called CMI (SinusQuick) Implant: an implant designed to easily achieve maximum initial fixation in maxillary or mandibular bone during implant placement.
